- Provides a seamless path to EHR adoption

## Prepare for the New Reality of Healthcare Finance

Beginning in January 2012, healthcare providers must submit electronic transactions to Medicare and other payors in the new ANSI X12 version 5010 standard. With the ANSI 5010-compliant Medisoft v17 release, your practice will be prepared once the new standards go into effect.

#### Revenue Management

Ensure the accuracy of your claims before you submit them. Medisoft v17 allows you to verify patient eligibility and use pre-claim editing to review your filings for errors on the front end. You can dramatically reduce the number of returned claims that cost your practice time and money.

The revenue management solution translates and displays electronic remittance advice (ERA) in an intuitive window. The biller can efficiently review payment information, flag changes and post individual payments and adjustments.

#### Billing

Customizable rules-based grids allow you to generate claims that quickly and easily meet the filing requirements of different carriers. With that level of flexibility, your practice can manage virtually any claim submission. Medisoft v17 includes numerous enhancements to comply with the new ANSI 5010 standards.

#### **Patient Statements**

Patient statements are made easy with integration between Medisoft v17 and BillFlash<sup>SM</sup> from NexTrust. With BillFlash, you save time and money by uploading your patient statements directly from Medisoft. BillFlash will then print and mail your professional, patient-friendly statements. Learn more about the benefits of BillFlash at www.billflash.com. "Medisoft is delivering a night and day difference in practice productivity. Paper and manual processes are eliminated. Electronic access to patient information is driving better patient care."
